

WALL GAME MICRO:BIT

ABOUT ME

I'm Milán Horváth and I'm 12 years old boy. For the first time in March 2017 I used Micro: Bit. This is a very interesting small computer. I programmed Microbit in "JavaScript Blocks Editor".

WALL GAME

I've created a game for this Micro:Bit. In my game there are four levels. The goal is to come down walls must be avoided. With A button go left, with B button go right. In one level 15 walls come down. The walls speed grows.
